# Petrel

# Lighting the way...

to increased safety

## The Portable Luminaire Family

Our Petrel LED lighting range are highly efficient luminaires certified for use in Zone 1, 21, 2, 22 and boast class leading performance in any temporary / portable lighting task.

The LED light engine provides a long service life which is virtually maintenance free. The linkable version of our ATEX LED luminaire range allows for multiple lights to be joined together so that much larger areas can be illuminated with a single power supply.

The Portable family is completed by a range of Zone 0 rated rechargeable and single use battery powered LED torches.

## Petrel Ex Lighting Range At A Glance

- Up to 12,500 Lumen output depending on variant
- Temperature range of -40° to +55° C (depending on variant)
- Low maintenance high efficiency LED light source
- Heavy duty durable construction
- Steel swivel mounting bracket and frame (transportable)
- Units are linkable via ATEX approved plug & socket arrangements
- A simple design ensures that the product is easy to install and use
- A robust design that has been tested to the highest possible rating of IK10
- Supplied with chemical and scratch resistant polycarbonate lens as standard
- Tempered glass lens as an option (transportable)
- Low voltage versions available (PLX range)
- Manufactured solely in the UK

ABLE Instruments are a leading UK distributor, stockist and service provider of  
Petrel Limited portable ATEX lighting equipment for use in Zone 1, 21, 2 and 22 hazardous areas.

# Simple and intuitive online procurement of industrial instruments & controls

## 30 Day Payment Terms

ABLE customers can now purchase online utilising existing 30 day payment terms at any time. Simply add your required products to the basket and insert your P.O. number at the payment stage to process your order.

## Dedicated Customer Portals

Our dedicated customer portals are available for companies with more specific needs. This area includes all historical data incorporating personalised pricing and a sourcing form for procurement of products not found on the site.

## Intuitive Technical Product Configurator

Products can now be fully customised online using our intuitive product configurator. Based on 247able's internal logic, incorrect specifications can not be selected and all configured products build unique part numbers.

## Experienced Specialist Technicians On Hand

Years of experience give our specialist technicians an inherent understanding of their respective products and applications and most importantly, the ability to correctly apply 'fit for purpose' equipment.

## Procurement And Sourcing Service

ABLE have been serving as a procurement and sourcing service provider for our customers since 1985. If you cannot find the required product on 247able, simply use the dedicated online form on our sourcing service page.

## Convert To Quotation At Checkout

Want to specify instrumentation and defer payment to your procurement team? Want to save a quote and order it later? Using this tool, all recipients receive an email of the quote alongside links to proceed to purchase.

## Why purchase with us?

Providing a hassle free, secure, fast and reliable service.

### Hassle Free

247able.com is the one-stop supplier for engineers and procurement specialists, offering best in class instrumentation from renowned manufacturers in an intuitive online engine.

### Secure Checkout

Once the correct instrumentation is found via our website and technical support, customers can checkout 100% securely using Stripe or utilising their company's credit limit.

### Reliable Delivery

With UPS as our courier of choice, we offer a fast, reliable delivery service. Customers who sign up for a 247able account can also manage and track orders in the customer account area.

## Have a particular application or project in mind?

ABLE are the leading authorised representative and distributor for these asset management/field comms products within the UK and can assist you and your customers in the following areas:

- Pre-loading of any free issue industry standard software on to the device
- Handle future pre-arranged 'call off' quantities for expedient delivery
- Offer after sales support utilising our in-house expertise
- Offer training into how the ATEX device(s) can be used either via a video call or hands-on instruction on our state-of-the-art training rig.
